

On the Commission's own motion

STATEMENT OF SARAH WHITAKER

1. My full name is Sarah Whitaker.
2. I am employed by the United Workers Union as the Lead Organiser for the Public Sector – Disability portfolio. I have been the lead disability organiser in Western Australia for around 6 years. I have been employed in the union movement for 24 years, between Australia and the United Kingdom.
3. As part of my duties, I organise disability sector employees, who provide both residential and community care services to people living with disability. This includes employees in both the State and National systems. I am also involved in the bargaining of agreements in both systems. I have extensive experience with current and former state-system employers like Rocky Bay, IdentityWA, and the Disability Services Commission.

Our members

4. Many of UWU's members in the disability sector come from migrant backgrounds. Many have a low level of familiarity with state and federal industrial relations systems. The majority of disability support workers will have no tertiary qualification, or will hold

a certificate III in disability/community supports. English is often a second or third language.

Effect of State Wage

5. I believe there are two trends in the disability sector:
 - (a) A widening gap between rates of pay offered by existing state employers and the funding they receive through the National Disability Insurance Scheme (**NDIS**) which is based on the *Social, Community, Home Care and Disability Services Industry Award 2010* (**SCHADS award**); and
 - (b) Disability sector employers attempting to structure themselves as state-system employers to exploit this difference between state conditions and the national system (including claims that employees are only covered by the *Minimum Conditions of Employment Act*).
6. Disability sector employees in the State system are generally covered by the *Social and Community Services (Western Australia) Interim Award 2011* (**SCS award**) or the *Aged and Disabled Persons Hostels Award, 1987* (the **hostels award**; together, the **state awards**).¹ State system and national system employees perform substantially the same duties. The NDIS Disability Support Worker Cost model classifies workers as DSW Level 1 to 4, and makes assumptions about the equivalent SCHADS classification. **Annexure 1** is a copy of the cost model, effective from 1 July 2023. The following table sets out the assumed rates of pay.

¹ Note that the hostels award only applies to the list of Schedule B respondents and is of limited application.

	Assumed SCHADS Classification	SCHADS Award Hourly Rate ²
DSW Level 1	2.3	\$34.22
DSW Level 2	2.4/3.1	\$35.57
DSW Level 3	3.2	\$37.03
DSW Level 4	4.4	\$44.68

7. The Cost Model then provides on-costs for leave, superannuation, allowances, assumed shift penalty rates, operational overheads like workers compensation expenses, rostering, supervision, human resources, etc., and a built in 2% margin on all costs. After all of these costs and loadings, the NDIS is charged the following per hour:

	DSW 1	DSW 2	DSW 3	DSW 4 ³
Cumulative cost/hour, after loadings	\$65.47	\$70.85	\$74.63	\$98.30
Cumulative increase from standard hourly rate	91.31%	99.17%	101.53%	120.01%

8. This means, that after all on costs, guaranteed profit, and other loadings, an hour of labour that is compensated to a worker at \$34.22 has been charged to the NDIS at \$65.47.
9. I believe that, largely because of the movement of funding in the sector away from a state disability system to the NDIS, some employees are trying to use ambiguity, mismatches, and base-rate differences in the state awards to maximise the profits they can make from the NDIS.
10. I have seen adult members paid as little as \$25.60 an hour before loadings, with employers asserting the employee is award free and the only safety net conditions are the MCE Act. In this situation, the employee was employed through a trustee, fell outside the scope of the hostels award as they were not working in a group home setting (and weren't employed by a named employer), and the employer characterised the SCS

² As at time of cost model publication effective 1 July 2023. Source: NDIS, *Disability Support Worker Cost Model Assumptions and Methodology 2023-24*, 16 June 2023, page 5, <<https://www.ndis.gov.au/media/6052/download?attachment>> ('Cost Model').

³ Cost Model, page 9.

award as only applying to community and social workers, not to disability support work in a community setting. In these circumstances, the employer turns a hypothetical \$1.27/hour margin under the Cost Model, into a \$9.89/hour margin because of this purported award free status.

11. I have also seen entities form state-based registered associations that claim to not be engaged in trade or commerce, or entities that claim to organise direct employment by an NDIS participant or multiple participants, wholly disavowing an employment relationship. These employers then charged employees out as if they were domestics or live-in au pairs, or the employee was employed by the individual participant as if they were a sole trader in the state-system.
12. In my experience organising members and working with providers in enterprise agreement negotiations, most work is billed at a DSW Level 1. DSW Level 2, 3 and 4 is billed for higher intensity supports that are often seen in group home settings. There is a strong drive for employers to control labour costs at the SCHADS Level 2.3 or lower for low intensity supports, regardless of whether they are state or national system employers, and to closely match the level of support to the classification of worker employed.
13. My understanding of the SCS Award is that its classifications broadly align, and were intended to align, with the SCHADS. The following table shows the difference between permissible SCS Award classifications, based on my experience of the SCS Award, and the SCHADS-based Cost Model funding.

DSW Level in Cost Model	SCHADS Level	Cost model hourly rate ⁴	SCS Award Levels	SCS hourly rates	\$Difference	% below SCHADS-based funding
1	1.1-2.3	\$34.22	1.1	23.74372	-\$10.48	-30.61%
			1.2	24.3975	-\$9.82	-28.70%
			2.1	25.11483	-\$9.11	-26.61%
			2.2	25.85083	-\$8.37	-24.46%
			2.3	26.55102	-\$7.67	-22.41%
2	2.4/3.1	\$35.57	2.3	26.55102	-\$9.02	-25.36%
			3.1	27.18562	-\$8.38	-23.57%
3	3.2	\$37.03	3.2	27.8848	-\$9.15	-24.70%
			3.3	28.417	-\$8.61	-23.26%
4	4.4	\$44.68	4.1	28.417	-\$16.26	-36.40%
			4.2	28.93659	-\$15.74	-35.24%
			4.3	29.63576	-\$15.04	-33.67%
			4.4	31.03714	-\$13.64	-30.53%

14. The above table illustrates the inequity between employment in the state system and the SCHADS-based NDIS funding. There is no discernible reason to me as a union official why state rates of pay in the disability sector should sit between 36.4% and 22.41% below what providers are guaranteed to be paid by the federal government through the NDIS for that work.
15. This creates a clear incentive for employers entering or already working in this sector to try and structure themselves to avoid the SCHADS minimum rates, as they can significantly increase their profit beyond the 2% built into the Cost Model. This profit comes at a direct cost to already low paid workers.
16. The ability to exploit differences between an employee's classification and funding under the SCHADS is far less pronounced. For example, the disparity between a level 1 under the SCHADS and the level 2.3 DSW 1 funding. A level 1 worker will receive between \$24.49/hour and \$26.18/hour. Most workers will receive more than the SCS Award level 2 rates, with 12 months of experience under the SCHADS. They

⁴ Ibid 5.

can then progress to SCHADS Level 2 with sufficient experience, or directly to level 2.1 with a certificate qualification.

17. The SCS Award requires promotion or reclassification between levels, unlike the SCHADS. In my experience, state-based employers attempt to keep employees within the level 1 band for a longer period than their national system competitors. I also hold other concerns about the state system, like 75% penalties for Sunday shifts, compared to 100% in the SCHADS, and it is also harder to be classified as a shiftworker under the SCS for an additional week of annual leave because the definition is limited to Sunday work rather than 'weekends'.

Effect on members

18. Our members employed by these smaller and newer providers receive significantly lower rates of pay, penalties and leave entitlements. Most disability support workers, state-based or national system, already receive low wages, but in my experience, state-based wages are far lower. I actively try to help state-based workers find employment with national system employers because of this difference in wages.
19. Members tell me that they chose to work in the disability sector as they want to spend their lives helping others, but whilst the work is rewarding, it is also hard. Disability support work is both physically and emotionally demanding, regular training and skills development is necessary, occupational violence is common and workers often feel both undervalued and underpaid.
20. I have been regularly told by members that they have difficulty making ends meet. Many members work long hours across two or three jobs, they can't afford to buy a home or they struggle with their rent. They live pay to pay, have no savings and struggle to pay their bills. Extra expenses such as a higher-than-average bill, an appliance repair or needing new glasses pushes means struggling with their budget or

pushes them into debt. There is limited money for luxuries such as eating out, theatre or movie visits and taking a holiday is almost impossible for them, which is backed up by the issues across the sector with excessive leave balances. Many members also not only support their families living here but also overseas, sending money to family members, supporting parents, children, and extended family in their country of birth.

Introduction

The National Disability Insurance Scheme (NDIS) was established in 2013 to support people with disability to pursue their goals, to help them to realise their full potential, to assist them to participate in and contribute to society, and to empower them to exercise choice and control over their lives and futures. The NDIS provides funding to eligible individuals (“participants”) so that they can purchase, in the open market, the disability related goods and services (“supports”) that they need. The NDIS is administered by the National Disability Insurance Agency (NDIA). The NDIA has a role, as market steward, to create an efficient and sustainable consumer driven marketplace for the supply of disability supports. It regulates the commercial relationships between providers and participants, including through price regulation. The pricing arrangements aim to maintain and increase market supply, and help markets grow to a more mature state in the future, while recognising the need for financial sustainability. Further information on the NDIA’s approach to pricing can be found in the *NDIS Pricing Strategy* and in the *Final Report of the Annual Pricing Review 2022-23*.

The NDIA uses the Disability Support Worker Cost Model that is described in this document to determine the price limits for supports that are delivered by Disability Support Workers (DSWs).

The DSW Cost Model estimates the fully loaded cost of a billable hour of support considering : base pay; shift loadings; leave entitlements; salary on costs; employee allowances; operational overheads (including supervision costs, utilisation costs and workers’ compensation costs); corporate overheads and margin.

The Cost Model estimates the efficient costs of providing supports by considering:

- **Base Salary** costs, including shift loadings. Note that in the Cost Model, costs are based on permanent worker costs.
- **Direct On-costs**, which covers those costs of employment associated with Superannuation entitlements, Annual Leave entitlements, Personal Leave entitlements, Long Service Leave entitlements and Employee Allowances.
- **Operational Overheads**, which covers those costs that are in the operational control of the provider and include workers compensation costs, utilisation costs (billable versus unbillable hours), supervision costs (including quality and safeguarding costs) and workforce rostering and balance measures such as the share of the workforce that is permanent or casual, and the extent to which overtime is used by the business.
- **Corporate Overheads**, which covers those costs incurred to run the administrative side of a business. These costs include the accounting, human resources, legal, marketing, and information technology functions.
- **Margin**, which represents the return that the provider makes because of the provision of working capital to the business.
- **Temporary Loading** which recognises the variable costs of COVID and of adjusting to the new provisions in the *Social, Community, Home Care and Disability Services Industry Award 2010* (SCHADS Industry Award) that were come into effect on 1 July 2023. These costs are being closely monitored by the NDIA.

Description of the Cost Model

This section sets out the methodology and assumptions of the NDIS DSW Cost Model.

Base Salary and Shift Loadings

The NDIA recognises that some Disability Support Workers are classified as Home Care Employees and others are classified as Social and Community Services Employees under the SCHADS Industry Award.¹ The Cost Model take its parameters from the Social and Community Services Employees section for the SCHADS Industry Award, which has the more generous provisions. The NDIA also recognises that some Disability Support Workers are employed under Enterprise Bargaining Agreements (EBAs). However, these EBAs must leave the worker no worse off overall than they would be under the relevant Award. Any additional benefits offered by EBAs over the Award have been agreed to by providers and are often offset by productivity gains. The NDIA therefore considers the conditions set out in the Social and Community Services Employees section of the SCHADS Industry Award to be the most appropriate foundation for the DSW Cost Model.

The NDIA recognises that providers must employ Disability Support Workers with different skill levels and levels of experience to meet the different needs of participants. The Cost Model therefore has different sets of cost assumptions for four types of workers that will be referred to as DSW Level 1, DSW Level 2, DSW Level 3 and DSW Level 4.

Table 1 sets out the Cost Model's assumptions with respect to the base pay of DSWs.

Table 1: Assumed SCHADS Industry Award Classifications and Pay Rates, 1 July 2023

	Assumed SCHADS Classification	Award Hourly Rate
DSW Level 1	2.3	\$34.22
DSW Level 2	2.4/3.1	\$35.57
DSW Level 3	3.2	\$37.03
DSW Level 4	4.4	\$44.68

Table 2 sets out the Cost Model's assumptions with respect to shift loadings.²

Table 2: Shift Loadings, 1 July 2023

Shift	Permanent Loading
Weekday	0.0%
Saturday	50.0%
Sunday	100.0%
Public Holiday	150.0%
Evening Shift	12.5%
Night Shift	15.0%

¹ The SCHADS Industry Award can be viewed [here](#).

² SCHADS Industry Award: Clauses 10.4(b), 26 and 29.3.

Direct On-costs

Direct On-costs consist of leave costs (days worked versus days paid), plus salary-like on-costs (superannuation and employee allowances).

Days Worked Versus Days Paid

The Cost Model recognises that under the SCHADS Industry Award a permanent worker's ordinary hours of work will be 38 hours per week³, and that they will be available to work on 220 days a year, because under the SCHADS Industry Award and the National Employment Standards⁴ they must be paid for:

- 20 days of annual leave;⁵
- 10 days of public holidays;⁶
- 10 days of personal leave⁷; plus domestic and family violence leave⁸.

The Cost Model recognises that providers need to accrue the revenue to meet the costs of these leave accruals during the billable hours of the DSW. The Cost Model assumes that all annual, public holiday, and personal leave entitlements are drawn on, including personal leave. It assumes that the number of workers accessing family and domestic violence leave to be 2.3%, with those accessing the leave assumed to be accessing the entire minimum entitlement.

The Cost Model also recognises that workers accrue Long Service Leave (LSL) entitlements when they work and that again providers need to accrue the revenue to meet the costs of this leave accrual during the billable hours of the DSW. The Cost Model assumes that workers accrue 4½ days of long service leave each year.⁹ The Cost Model assumes that all long service leave entitlements are drawn on.

In line with the SCHADS Industry Award, the Cost Model also provides a 17.5% loading for annual leave to compensate workers for the shifts they would have otherwise taken.¹⁰

³ SCHADS Industry Award: Clause 25.1.

⁴ The National Employment Standards govern leave and several other conditions in Awards, and also may not be reduced by EBAs. <https://www.fairwork.gov.au/employee-entitlements/national-employment-standards>

⁵ <https://www.fairwork.gov.au/leave/annual-leave>

⁶ <https://www.fairwork.gov.au/leave/public-holidays>

⁷ <https://www.fairwork.gov.au/leave/sick-and-carers-leave/paid-sick-and-carers-leave>

Note: The Cost Model assumes all workers utilise all of their personal leave entitlement each year even though some workers may not use their entitlement.

⁸ <https://www.fairwork.gov.au/leave/family-and-domestic-violence-leave/employer-guide-to-family-and-domestic-violence>

⁹ <https://www.fairwork.gov.au/leave/long-service-leave>

Note: The Cost Model assumes all workers qualify for LSL accruals and that all workers will eventually access their LSL entitlement. This reflects the rollout of portable LSL schemes in some jurisdictions.

¹⁰ SCHADS Industry Award: Clause 31.3

Superannuation

The Cost Model assumes that in 2023-24 superannuation is paid at the statutory 11.0% of base salary, including while on leave.¹¹

Employee allowances

The Cost Model assumes that employee allowances are on average equal to 1.0% of base salary on average.

Cumulative Impact of Direct on-costs

The impacts of leave loadings and direct on-costs are shown in Table 3.

Table 3: Impact of Direct On-Costs on the Cost per Worked Hour of a DSW

	DSW 1	DSW 2	DSW 3	DSW 4
Standard Hourly Rate	\$34.22	\$35.57	\$37.03	\$44.68
Allowance for Annual leave				
a. No. hours leave accrued in a year (hrs/yr.)	152	152	152	152
b. Loading	17.50%	17.50%	17.50%	17.50%
c. Proportion of leave taken	100%	100%	100%	100%
Cost per worked hour	\$3.66	\$3.80	\$3.96	\$4.78
Allowance for Personal leave				
a. No. hours leave in a year (hrs/yr.)	78	78	78	78
b. Loading	0%	0%	0%	0%
c. Proportion of leave taken	100%	100%	100%	100%
Cost per worked hour	\$1.60	\$1.66	\$1.73	\$2.09
Allowance for Public Holiday leave				
a. No. hours leave accrued in a year (hrs/yr.)	76	76	76	76
b. Loading	0%	0%	0%	0%
c. Proportion of leave taken	100%	100%	100%	100%
Cost per worked hour	\$1.56	\$1.62	\$1.69	\$2.03
Allowance for Long Service leave				
a. No. hours leave accrued in a year (hrs/yr.)	32.93	32.93	32.93	32.93
b. Loading	0%	0%	0%	0%
c. Proportion of leave taken	100%	100%	100%	100%
Cost per worked hour	\$0.67	\$0.70	\$0.73	\$0.88
Superannuation				
Superannuation Rate (%)	11.0%	11.0%	11.0%	11.0%
Superannuation per worked hour (\$)	\$4.59	\$4.77	\$4.96	\$5.99
Employee Allowances				
Allowance Rate (%)	1.00%	1.00%	1.00%	1.00%
Allowance Cost per worked hour (\$)	\$0.34	\$0.36	\$0.37	\$0.45
Cumulative cost/hour, after Direct On-costs	\$46.64	\$48.48	\$50.47	\$60.90
Cumulative increase from standard hourly rate	36.30%	36.30%	36.30%	36.30%

¹¹ <https://www.ato.gov.au/rates/key-superannuation-rates-and-thresholds/?anchor=Superguaranteepercentage>

Operational Overheads

Operational Overheads include those costs which are in the operational control of the provider such as workers compensation costs, utilisation costs, supervision costs and workforce rostering and balance measures such as the share of the workforce that is permanent or casual, and the extent to which overtime is used by the business.

The Cost Model expresses Operational Overheads as a percentage of direct costs and assumes that they increase as the complexity of the support increases (Table 4).

Table 4: Impact of Operational Overheads on the Cost per Billable Hour of a DSW

	DSW 1	DSW 2	DSW 3	DSW 4
Cumulative cost/hour, before Operational Overheads	\$46.64	\$48.48	\$50.47	\$60.90
Operational Overheads (%)	21.65%	26.65%	28.15%	39.90%
Operational Overheads (\$)	\$10.10	\$12.92	\$14.21	\$24.30
Cumulative cost/hour, after Operational Overheads	\$56.74	\$61.40	\$64.68	\$85.19
Cumulative increase from standard hourly rate	65.80%	72.62%	74.66%	90.68%

Corporate Overheads

Corporate Overheads include the costs incurred to run the administrative side of a business. These costs include the accounting, human resources, legal, marketing, and technology functions.

The Cost Model assumes that Corporate Overheads are 12.0% of direct costs (including Operational Overheads) (Table 5).

Table 5: Impact of Corporate Overheads on the Cost per Billable Hour of a DSW

	DSW 1	DSW 2	DSW 3	DSW 4
Cumulative cost/hour, before Corporate Overheads	\$56.74	\$61.40	\$64.68	\$85.19
Corporate Overheads (%)	12.00%	12.00%	12.00%	12.00%
Corporate Overheads (\$)	\$6.81	\$7.37	\$7.76	\$10.22
Cumulative cost/hour, after Corporate Overheads	\$63.55	\$68.77	\$72.44	\$95.42
Cumulative increase from standard hourly rate	85.70%	93.33%	95.62%	113.56%

Margin

The Cost Model assumes a 2.0% margin on all costs. This equates to a rate of return of 8.0% against working capital that is equivalent to three month's wages and entitlements (Table 6).

Table 6: Impact of Margins on the Cost per Billable Hour of a DSW

	DSW 1	DSW 2	DSW 3	DSW 4
Cumulative cost/ hour, before Margin	\$63.55	\$68.77	\$72.44	\$95.42
Margin (%)	2.00%	2.00%	2.00%	2.00%
Margin (\$)	\$1.27	\$1.38	\$1.45	\$1.91
Cumulative cost/hour, after Margin	\$64.82	\$70.14	\$73.89	\$97.33
Cumulative increase from standard hourly rate	89.41%	97.20%	99.54%	117.83%

Temporary Loading

The Cost Model applies a temporary loading of 1.0% (Table 7).

Table 7: Impact of Temporary Loading on the Cost per Billable Hour of a DSW

	DSW 1	DSW 2	DSW 3	DSW 4
Cumulative cost/hour, before Temporary Loading	\$64.82	\$70.14	\$73.89	\$97.33
Temporary Loading (%)	1.00%	1.00%	1.00%	1.00%
Temporary Loading (\$)	\$0.65	\$0.70	\$0.74	\$0.97
Cumulative cost/hour, after Temporary Loading	\$65.47	\$70.85	\$74.63	\$98.30
Cumulative increase from standard hourly rate	91.31%	99.17%	101.53%	120.01%

Accommodation Cost Amounts

These amounts are indexed on 1 July each year in line with movements in the increase in the Consumer Price Index over the 12 months to the end of the preceding March.

Centre Based Capital Amount

When a support item (“the primary support”) in the Assistance with Social, Economic and Community Participation Support Category is delivered in a facility (Centre), by a provider in one of the following Registration Groups:

- High Intensity Daily Personal Activities (0104);
- Specialised Supported Employment (0133); and
- Group and Centre Based Activities (0136)

then the provider can claim an additional amount for the costs of running and maintaining the facility through the relevant Centre Capital Cost support item.

If the primary support is being delivered to a group of participants, then the provider can claim up to price limit of the relevant Centre Capital Cost support item in respect of each of the participants for each hour of the support.

When a support is delivered partially in a Centre and partially in the Community, and the Centre is available at all times during the support if required, then providers can claim up to the price limit for the relevant Centre Capital Cost support item in respect of each of the participants for each hour of the entire period of the support.

In 2023-24, the Centre Based Capital Amount is \$2.44.

Short Term Accommodation Amount

The short term accommodation amount has three components

- Short Term Accommodation Labour Component, which covers the costs of the disability support workers providing support;
- Short Term Accommodation Capital Component, which covers the capital costs of the support; and
- Short Term Accommodation Hotel Component, which covers costs like food, heating, cleaning, etc. associated with the support.

In 2023-24, the latter two components are as follows:

- Short Term Accommodation Capital Component = \$146.75 per day
- Short Term Accommodation Hotel Component = \$59.50 per day

Medium Term Accommodation Amount

The Medium Term Accommodation amount is equal to the Short Term Accommodation Capital Component.

ANNEXURE 1

Price Limits Determined by the Cost Model

The following Table sets out how the price limits for each relevant NDIS support item is related to the NDIA's estimates of the efficient costs of delivering supports. Further information can be found in the NDIA's *NDIS Pricing Arrangements and Price Limits 2023-24* on the [NDIS website](#).

Support Item Number	Support Item Name	Methodology	Basic Model	Loading	Adjustment

Notes

1. Temporary Transformation Payment (TTP)

The 2023-24 price limit for each TTP support item is higher than the price limit for the equivalent non-TTP item. In 2023-24, the TTP additional amount is equal to 1.5% of the relevant DSW 1 hourly price limit for each time of day and day of week.

2. Assistance with Self Care Activities - Night-Time Sleepover Support

The price limit for these support items is equal to the SCHADS Industry Award Sleepover Allowance¹² plus three times the relevant DSW 1 Weekday Night hourly price limit.

3. Establishment Fee for Personal Care/Participation

The price limit for this support item is 10 times the relevant DSW 1 Weekday Daytime hourly price limit.

4. Short Term Accommodation and Assistance (including the respite care)

The daily price limits for each 1:n weekday support item is the sum of the following amounts, where n is the number of participants being supported by the worker:

- The short term accommodation capital component (see page 10);
- The short term accommodation hotel component (see page 10);
- 1/n times 8 times the relevant DSW 2 Weekday Daytime hourly price limit;
- 1/n times 8 times the relevant DSW 2 Weekday Evening hourly price limit;
- 1/n times 8 times the relevant DSW 2 Weekday Night hourly price limit.

The 2023-24 daily price limits for each 1:n Saturday support item is the sum of the following amounts:

- The short term accommodation capital component (see page 10);
- The short term accommodation hotel component (see page 10);
- 1/n times 24 times the relevant DSW 2 Saturday hourly price limit.

The 2023-24 daily price limits for each 1:n Sunday support item is the sum of the following amounts:

- The short term accommodation capital component (see page 10);
- The short term accommodation hotel component (see page 10);
- 1/n times 24 times the relevant DSW 2 Sunday hourly price limit.

The 2023-24 daily price limits for each 1:n Public Holiday support item is the sum of the following amounts:

- The short term accommodation capital component (see page 10);

¹² Calculated as 4.9% of the weekly minimum wage (before Equal Remuneration Order adjustment) for a Social and community services employee level 3 at pay point 3 in clause 15.3 of the SCHADS Industry Award. See Clause 25.7(d) of the SCHADS Industry Award.

- The short term accommodation hotel component (see page 10);
- 1/n times 24 times the relevant DSW 2 Public Holiday hourly price limit.

5. Group Activities (Transitional Arrangement)

The price limits for community-based group supports apply to each hour of support and are based on the hourly price limits of the relevant 1:1 community participation support (for each level of support and time of day and day of week). If the price limit for the relevant 1:1 support is P , and n is the number of participants being supported by the worker, then the price limit P_n for the 1:n community based support is given by the following formulae:

$$P_n = \frac{P + (n - 1) \times 0.12 \times P}{n}$$

For each additional person in the group (after the first) an additional 12.0% of the 1:1 hourly price limit (essentially seven minutes) is added to the hourly price limit.

The hourly transitional price limit for a centre-based group support is calculated by adding the hourly Centre Based Capital Amount (see page 10) to the hourly transitional price limit for the relevant community based group support.

6. Onsite Shared Supports in SDA

The price limit for Onsite Shared Supports in SDA or commonly known as the Concierge support is determined weekly claiming calculated by under a program of supports is \$1,365.88 (2.5 hours x \$78.05 ph. x 7 weeks) as the intention is that it is claimed on this basis for each day of the agreement. This sets the expectation of regular check ins that supports are working and the provider does not need to claim on an hourly basis and reinforces the idea it is a 24/7 available support.
